

Adam Gell

Senior Microsoft Intune Consultant | Consulting Leader

me@adamgell.com | github.com/adamgell | linkedin.com/in/adamgell

PROFESSIONAL SUMMARY

Senior Microsoft Intune consultant with 15 years of experience translating complex endpoint requirements into secure, supportable programs. Combines hands-on engineering across Microsoft Intune, Windows Autopilot, Microsoft Entra ID, Windows 365, and PowerShell with client advisory, pre-sales discovery, and delivery leadership.

CONSULTING IMPACT

Cross-platform delivery - Designs and implements endpoint solutions across Windows, iOS/iPadOS, Android, macOS, Linux, and Windows 365.

Trusted client advisor - Leads assessments, turns findings into practical recommendations, and aligns technical decisions with customer priorities.

Practice contribution - Supports pre-sales engagements and creates reusable PowerShell automation to improve delivery.

CORE EXPERTISE

Endpoint strategy: Assessments, Target-state design, Implementation roadmaps, Client recommendations

Intune engineering: Microsoft Intune, Windows Autopilot, Microsoft Entra ID, Windows 365, Endpoint Privilege Management, Endpoint Analytics, Remote Help

Consulting leadership: Discovery and pre-sales, Stakeholder alignment, Endpoint security, PowerShell automation, Change management, Technical guidance

PROFESSIONAL EXPERIENCE

Managing Consultant Engineer | CDW

Remote | June 2022 - Present

- Leads comprehensive Microsoft Intune assessments, translating current-state findings into target-state recommendations and practical implementation roadmaps.
- Designs and implements Microsoft Intune and Microsoft Entra ID solutions, including Windows Autopilot for Microsoft Entra joined and hybrid Microsoft Entra joined devices.
- Delivers cross-platform endpoint management for Windows, iOS/iPadOS, Android, macOS, Linux, and Windows 365 environments.
- Deploys Intune Suite capabilities including Endpoint Privilege Management, Endpoint Analytics, and Remote Help.
- Shapes solutions during pre-sales engagements and develops PowerShell automation to improve recurring device-management work.

Senior Systems Engineer | Applied Microsystems

Remote | Anchorage, Alaska | January 2022 - April 2022

- Led a Qualys Vulnerability Management, Detection and Response program and strengthened patch-cycle auditing, reporting, and reboot enforcement across the MSP client base.
- Served as the primary escalation point for infrastructure security investigations and remediation across customer environments.
- Reviewed Mimecast policies and introduced CIPP-based tenant audits to surface Microsoft 365 security and baseline gaps.
- Improved authentication processes and documentation practices to strengthen change management and operational consistency.

IT Consultant | NextStep Technology Advisors

Lancaster, Pennsylvania | October 2013 - December 2021

- Delivered consulting and technical support across 40+ client environments, advising leaders on goals, budgets, business processes, and technology transitions.
- Led four Microsoft Azure migrations and more than 15 transitions from on-premises systems to modern management with Microsoft 365, Microsoft Intune, and Azure.
- Designed solutions around SLAs, security, uptime, patch management, preventive maintenance, backup and disaster recovery, and remote monitoring.
- Applied Microsoft security capabilities, including Microsoft Defender for Endpoint, and established metrics to identify vulnerabilities and improve security practices.
- Implemented Citrix and Microsoft virtual desktop solutions, including Azure Virtual Desktop and Windows 365.

EDUCATION

AAS, Information Systems Administration | ITT Technical School Online | 2011
